

AI can't do *activewear.*

Seams drift. Fabric floats.
Bodies bend the wrong way.

ONE SET. FOUR PROOFS →

Lock the *set.*

Name the construction. Attach it to every frame.

01 Square-neck longline bra.

02 Wide double-layer waistband.

03 Flatlock seam down the outer thigh.

04 Seamless rib knit, bone white.

01

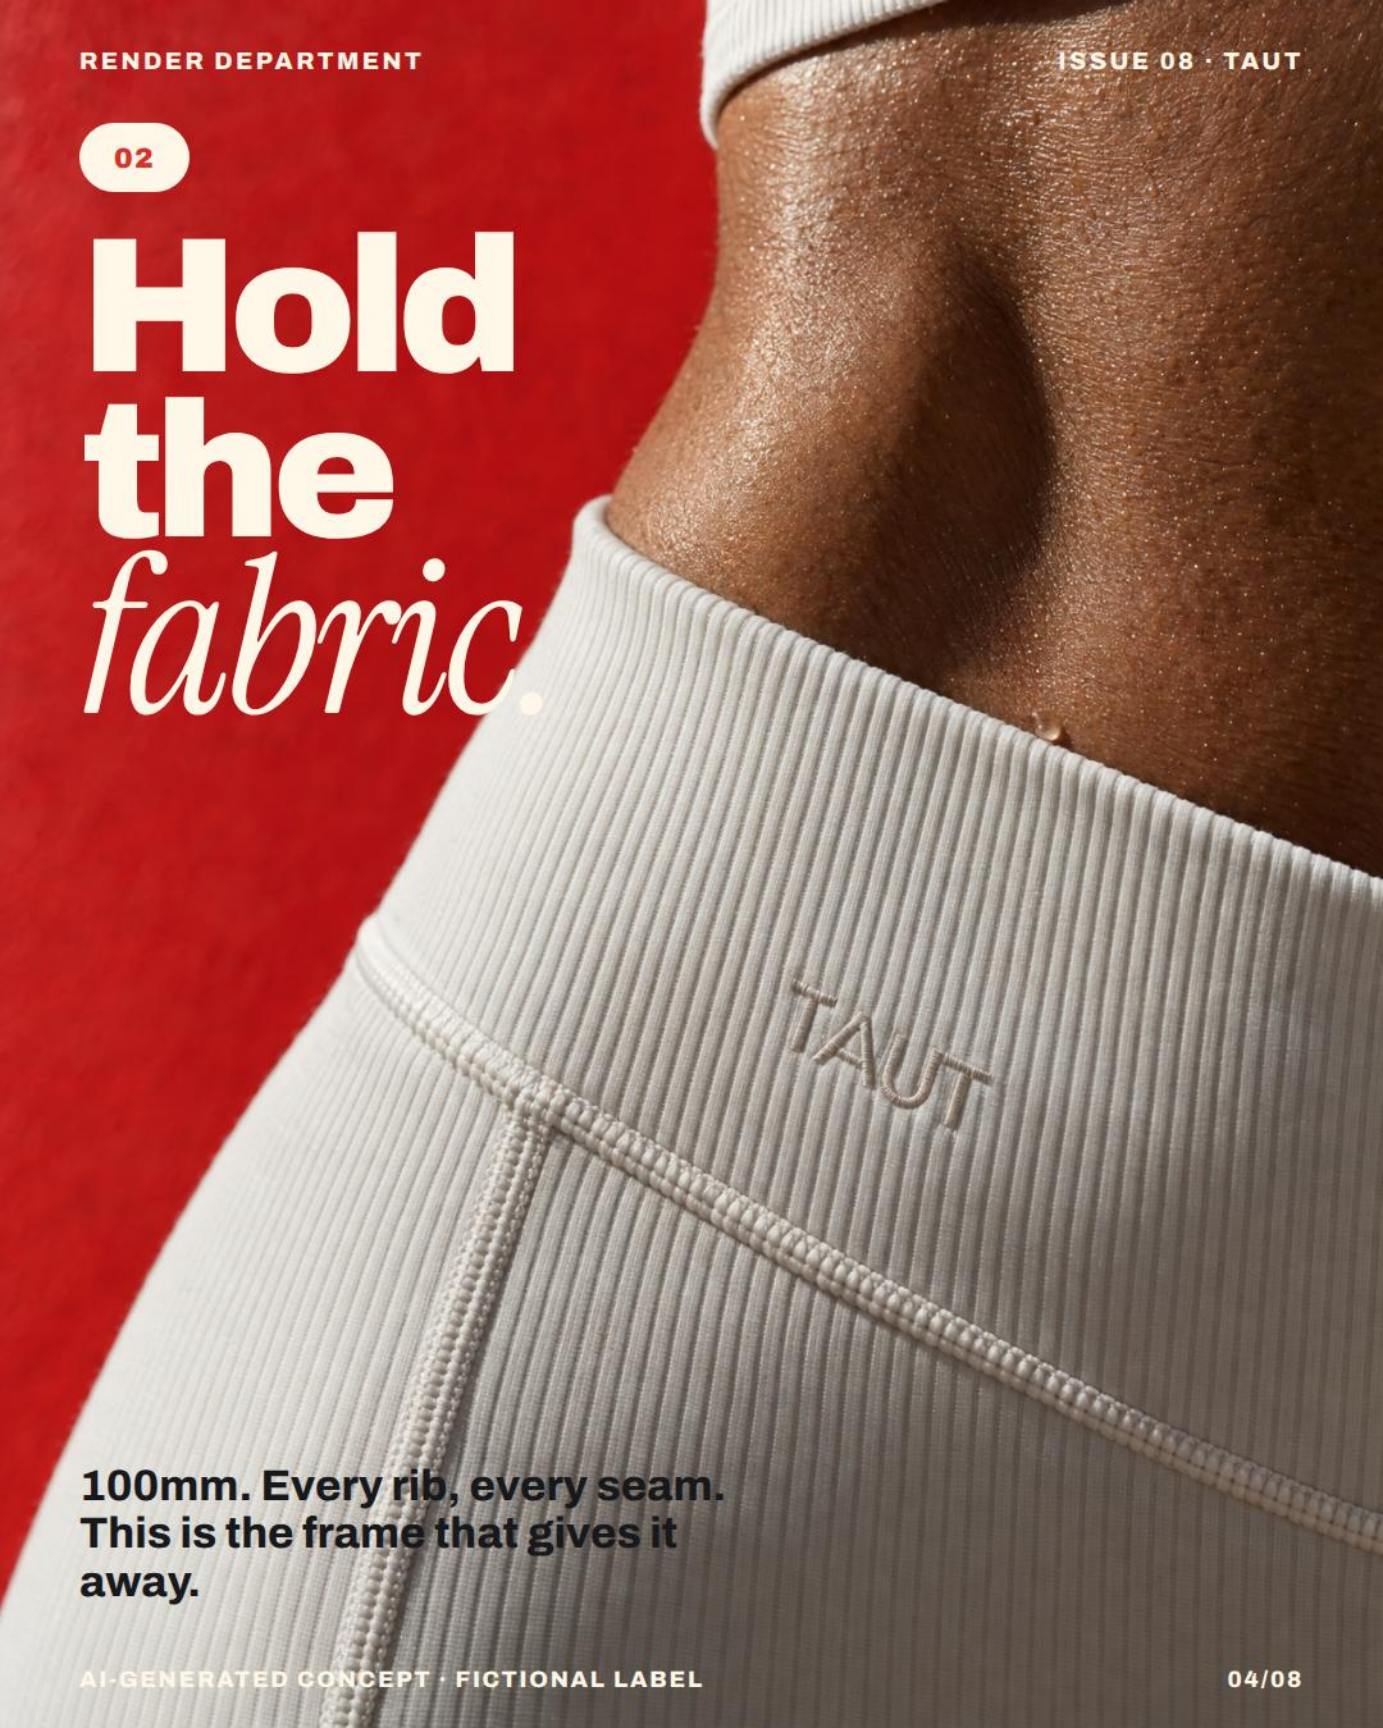

Hold the *body.*

Contact, tension, sweat. If the waistband doesn't bite, the fabric is floating.

02

Hold the *fabric.*

100mm. Every rib, every seam. This is the frame that gives it away.

03

Hold the *move.*

Frozen mid-air with real weight. The set stays the set.

04

Hold the *after.*

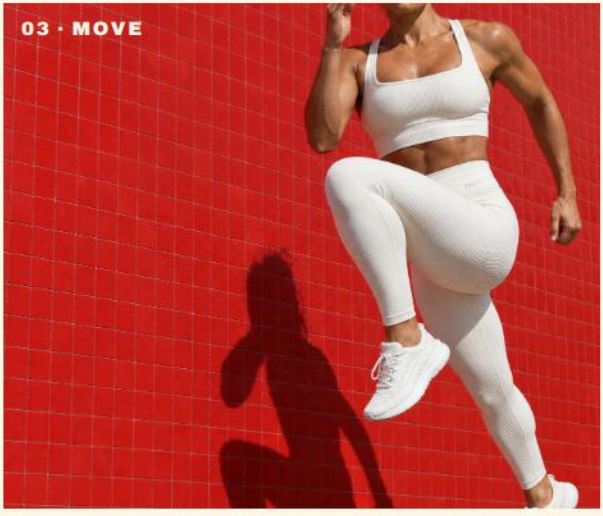

Put it inside a moment someone actually wants.

Same set. *Four proofs.*

One reference attached to every call. Now check the seams.

Stop faking *the fabric.*

Start locking the set.
